Hi Md Jakir Hossain,

Research shows that students do not have equal opportunities to learn. This imbalance was exacerbated by the COVID-19 pandemic. Kaggle and LearnPlatform hope your innovative data analysis will help reveal a solution.

In this analytics competition, you'll work to uncover trends in digital learning. Accomplish this with data analysis about how engagement with digital learning relates to factors like district demographics, broadband access, and state/national level policies and events. Then, submit a Kaggle Notebook to propose your best solution to these educational inequities.

**Total Prizes:**

\$20,000

**Submission Deadline:**

September 30, 2021

[Join This Competition](#)

Your submissions will inform policies and practices that close the digital divide, making education more equitable.

Good luck,

## Kaggle Competitions
